Made with 3 or 4 oz fishing weights
1/4 yd fabric will make 8

3 oz
fishing
weight

Remove wire on weight with pliers by twisting the wire until it breaks away. Use a hammer and pound any extra wire back into the weight until the surface is smooth.

Lay weight in center of circle and pull all the edges to the top. Wrap tiny rubber bands (hair product) around the top. Twist them until they are tight and push them down close to the weight. You can now pick up your pattern weights easily!
